

THE CLOUD FOR

ENTERPRISE

AVM cloud
A Time Company

AVM CLOUD | DIVERSE OFFERS

TYPES OF OFFERING

VIRTUAL PRIVATE CLOUD

Multi-tenancy cloud with logically separated network and compute resources, allows the enterprises to focus on their core business and not IT, able to take advantage of all other services from AVM Cloud.

Main Advantages

- OPEX model
- Lower total cost of ownership
- Easy to use and setup
- Easy to scale and reliable

Best Suited For

Predictable required resources or websites traffic.

CLOUD-IN-A-BOX

MAN on-premise OPEX model. Great for workloads that need to be in close proximity with users and other infrastructure. Suitable for companies or government bodies that require to fulfil regulatory and compliance requirement

Main Advantages

- OPEX model
- Customizable & higher flexibility
- Guaranteed resources availability
- Stronger security
- Regulator compliance

Best Suited For

Meeting company compliances or regulators requirements.

DEDICATED CLOUD

A multi-tenancy cloud with dedicated resources, able to enjoy the benefits of public cloud without receiving noises from neighbours. Taking advantage of the dedicated infrastructure to reduce the cost of some software licenses that was not catered for IaaS / PaaS environment.

Main Advantages

- OPEX model
- Optimal performance
- Advanced security

Best Suited For

Meeting licensing compliance

FUSION

A hybrid cloud data protection solution which backs up and replicates your data and systems on-premise and AVM Cloud. In the event of data loss, you may restore the data from your local server directly. In occurrence of a major disaster, all your critical data and system will be powered up at AVM Cloud to ensure your business continuity.

Main Advantages

- OPEX model
- Optimum DR & Backup performance
- Charged by a fraction of cost until DR required

Best Suited For

Require DR without investing a huge cost to setup & maintain a data centre.
